British sodier Assaulted.
A Cairo contemporary reports that a British private was assaulted on Priday evening in Machi street, and severely wounded on the head, by an Italian shop-keeper. The sodier had strumbled on a mat which the shop-keeper had left in the street, and on the private blagming him for his carelessmost, the Italian arwayely assaulted him. He is now in The Alhambra Theatre

The Almambra Theatre.

The performance billed for this evening at the Alhambra theatre is the Greinda, and we are gled to note that it will, be the coassion of Signors Baldi's benefit. Signorina Baldi has contributed in no simal! degree to the success of this delightful musical comedy, and though we have found occasion to criticise to a certain extent her impersonation of "Mimosa San," chiefly on account of her far too slow render-ing of her songs in general, and the "Goldfish" the control of the leading General, and the dollars, who have not seen her in the rôle of the leading General of the teachcuse that her general presentation of the part is excellent. Our best wishes for a "bumper" house.

FINANCIAL ACTIVITY.

M. da R. ffys, Prench Consul at Cairo, in an Interesting article to "L'Information" on the reconomic situation in Expty, remarks upon the financial activity in Expty during the year 1905 6, when quite a number of companies came into being in Cairo, and furnished the cocasion for the introduction of a large amount of foreign capital. He divides the companies into land, financial, indeatrial, commercial, transport and hotel companies. There are other two branches not included in this list—namely, land mortgage, in which Prench capital plays the most important role, and those companies with registered offices strong-principally in London, Paris and Belgium, which are governed by their respective national laws, and which has failed to find out much about. It is difficult to determine what is the proportion of capital sobscribed by foreigners and natives respectively in those companies which have been isseed in Expty, for the foreign element amongst their shareholders is resident in the land, and cannot be easily sorted out. Eleven land, companies were founded in 1905 and three in 1906, with a capital of 113,500,000C, and the contribution of the Exptylians thereto, always admitting the nonetainty named above, was about \$4,500,000.
